Professional Profile

Front-End Developer focused on building clear, efficient, and well-structured web interfaces using technologies like React, TypeScript, Tailwind CSS, and modern frontend tools.

With a strong background in game development—where I have worked for over five years—I expanded my career toward web programming. This journey gave me a deep understanding of programming logic, interactivity, and user experience, which I now apply to the design and development of robust, accessible digital solutions.

Currently, I combine both worlds (interactivity and structure) to create web experiences that are engaging, functional, and sustainable, following best practices in code and modular design.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3.
- **Frameworks & Libraries:** React, Tailwind CSS, Styled Components, PIXIJS.
- **Tools:** Vite, Git & GitHub, NPM, Figma (implementation).
- **Practices:** Responsive Design, Basic Web Accessibility, Clean Code, OOP.
- **Key Concepts:** State management, reusable components, REST API consumption, scalable design.

Professional Experience

Senior Game Developer

Killabunnies 2020 – Present

- Developed interactive games and web experiences using JavaScript, TypeScript, and PixiJS.
 - Built adaptive UI interfaces in HTML5.
 - Translated Figma designs into functional code following visual guidelines.
 - Collaborated with designers, QA, and developers in Agile/Scrum environments.
 - Optimized performance and loading times.
-

Education

Associate Degree in Game Design and Development 2016 – 2020

National University of the Littoral (Universidad Nacional del Litoral)

- Comprehensive training in interactive software development, programming, game engines, and user-centered design.
 - Hands-on focus on web technologies applied to interface development with HTML5 and JavaScript.
-

Languages

- Spanish: Native
- English: Technical reading · Basic conversational (A2/B1)
